RAJA SALMAN

BSCS Student | Software Developer |

rajasalman.dev@gmail.com | 0333-5912885 linkedin.com/in/raja-salman-73467839a | Rawalpindi, Pakistan

PROFESSIONAL SUMMARY

Driven 2nd-year Computer Science student with practical experience in web development and database systems. Skilled in building websites using AI tools, with a solid understanding of frontend development and MySQL. In the future, I aim to become a Java backend developer and cloud architect, working with technologies like Spring Boot and Spring AI.

TECHNICAL SKILLS

- **Languages: Java (OOP), C++, JavaScript (ES6+), SQL**
- **Web Technologies: HTML5, CSS3, JavaScript, Responsive Design**
- **Databases: MySQL (Basis), PostgreSQL, Database Design & Normalization, SDLC**
- **Frameworks & Tools: JavaFX, VS Code, IntelliJ IDEA, Git**
- **Digital Marketing: SEO Fundamentals, Off-Page SEO, Backlinks, PageRank, Core Web Vitals**

PROJECTS

Cricket League Management System | *MySQL, Database Design*

- Designed and implemented a full-stack relational database for managing cricket league operations including teams, players, matches, and statistics
- Applied normalization principles (3NF) and created optimized ER diagrams with proper entity relationships
- Delivered comprehensive professional documentation including system architecture, SQL queries, and testing results

Oasis Tree Lead Marketplace Website | *HTML5, CSS3, JavaScript,*

- Built production-grade single-page website for premium B2B lead data marketplace with modern dark-green/gold aesthetic
- Integrated WhatsApp, phone, and LinkedIn contact systems with EmailJS-powered contact form for client acquisition
- Implemented responsive design and professional UI/UX for enterprise-level presentation

Student Learning Management System | *Java, JavaFX, OOP*

- Developed desktop application for managing student data, course enrollments, and academic records

Inventory Management System | *C++, File Handling*

- Built logic-based system for tracking products, sales records, and inventory operations
- Utilized C++ file I/O and data structures for efficient data persistence and retrieval

EXPERIENCE

Oasis Tree (Premium Lead Data Marketplace) | *Islamabad, Pakistan*

- Managed data verification workflows for a B2B marketplace, ensuring high data accuracy and integrity.
- Audited raw data from Excel reports, fixing formatting issues, missing fields, and duplicates.
- Maintained structured tracking systems in Google Sheets to organize and filter client acquisition data.
- Executed data validation checks to eliminate errors and improve overall data reliability.

AI Hackathon Participant | *Aspire Pakistan / Pak Angels*

- Engaged in intensive problem-solving sessions applying AI concepts to real-world challenges
- Collaborated in cross-functional teams to develop and pitch innovative AI-driven solutions under tight deadlines

Team Lead - University Events | *NUML Rawalpindi*

- Led student teams in organizing and managing logistics for campus-wide events and activities

EDUCATION

Bachelor of Science in Computer Science (BSCS)

National University of Modern Languages, Rawalpindi Campus

- Relevant Coursework: Database Management Systems, Digital Marketing, Data Structures & Algorithms, Linear Algebra, Circuit Analysis
